

Project Summary and Justification (cont.)

Department Lincoln Police Department

Division _____

“Shared Site” with Lincoln Fire and Rescue

Demographics indicate that the Police Department’s future “stand alone” assembly station(s) will have to be located in South, Southeast, or East Lincoln. It **currently** requires officers of the Southeast geographic police team to travel 4.7-miles (9 minutes) in order to reach the “centroid” of that team area. Likewise, it requires an officer to traverse 9.4-miles (18 minutes) in order to reach the southeastern most point of the police team area which is **currently** at or near 94th & Old Cheney Road. Future annexation and the completion of current commercial projects near 98th and Highway 2 will only compound the travel distance/response times.

During the 2002 – 2008 Capital Improvements Program process, Lincoln Fire and Rescue identified a new fire station at or near 38th and Yankee Hill Road. Identified as Project-2, Station 16 in last year’s CIP documents, Lincoln Fire and Rescue gave this project priority of “A.” Would it be feasible to acquire sufficient land to meet both Projects? A search of design data from across the Nation revealed that other municipalities have used this concept to save overall acquisition and construction costs on similar projects.

Therefore, the Lincoln Police Department would be open to exploring “shared site” and/or “joint use” of land and facilities with Lincoln Fire Rescue. Further study of these concepts would be prudent.

Likewise, the Lincoln Police Department would consider exploring “shared site” and/or “joint use” of land and facilities with other local government and judicial agencies. For instance, a joint use with a drug court or similar venue might be feasible.
